

Quartley Public Debt Bulletin (Quarter 3, 2025)

Debt Management Department
Contact: dmu@mof.gov.so

Contents

1. Quarter 3, 2025. Progress in Debt Management issues.
2. Somalia's External Debt - stock and flow data
3. Risks Indicators of the Debt Portfolio
 - a. Interest rate risk indicators
 - b. Refinancing risk
 - c. Foreign exchange rate risk
 - d. Debt service ratios
4. Upcoming Activities for Q4, 2025

1. Quarter 3, 2025. Progress in Debt Management issues:

In this quarter, from July to September 2025, the Government of Somalia remained committed in implementing its debt relief strategy and engaging with its remaining bilateral and multilateral creditors to secure the appropriate debt relief within the frameworks of the Paris Club Agreed Minutes of March 2024 and the Enhanced HIPC Initiative.

Status of Negotiations:

Since the last quarter, the Debt Management Department (DMD) has continued its efforts to conclude debt relief agreements aimed at settling the outstanding arrears with the remaining non-Paris Club bilateral creditors and only multilateral creditor, as well as Spain's outstanding debt in accordance with the Paris Club Protocol of March 13, 2024 and the enhanced Heavily Indebted Poor Countries (HIPC) framework. The ongoing engagement and discussions with various creditors have yielded significant progress with the following key milestones achieved during this period:

- a) A preliminary agreement has been reached with Romania, which features the cancellation of 85% of the outstanding arrears and the rescheduling of the remaining 15% over a span of six (6) years. This arrangement will feature an annual payment structure with an interest rate of 1%.
- b) Concerning the other creditors, we are committed to engaging with these parties (i.e. Iraq, Libya, Bulgaria, Serbia, Spain and AFESD) in good faith and with our best efforts. In this context, the DMD team has drafted letters aimed at advancing our negotiations to achieve an agreement that is consistent with the Enhanced HIPC framework and the minutes from the Paris Club dated March 13, 2024. The letters, dated August 25, 2025, have been dispatched to their respective recipients.

2. Somalia's stock and flow data, Q3, 2025

Stock of debt at end of Quarter 3, 2025:

Somalia's current debt portfolio consists solely of external debt, which is categorized into multilateral and bilateral creditors, except with a single loan from a commercial lender in Serbia. The largest group of creditors for Somalia is comprised of bilateral creditors.

The total debt portfolio amounted to USD 1.4 billion at the end of the third quarter of 2025. Of the existing debt portfolio, multilateral creditors accounted for 42 percent of the total at USD 604.14 million. The largest creditors in this category are the Arab Fund for Economic and Social Development (AFESD), Arab Monetary Fund (AMF), and International Monetary Fund (IMF), in that order debt to bilateral creditors amounted to USD 838.88 million, with non-Paris Club creditors accounting for almost 94 percent of bilateral debt. The main non-Paris Club creditors include mainly Arab creditors such as the Abu Dhabi Fund, Government of Iraq, Kuwait Fund and the Saudi Fund. The ONLY remaining creditor of the Paris Club group is Spain, with negotiations progressing and an agreement anticipated to be finalized shortly. The commercial loan to a Serbian company amounted to USD 2.73 million.

Somalia's debt portfolio is still characterized by a sizeable amount of debt in arrears. There are remaining arrears mainly with non-Paris Club and one multilateral creditor which represented approximately 34 percent of the total outstanding debt of the country. The Government is committed to engaging its non-Paris Club and remaining multilateral creditors in order to secure comparable debt relief treatment and the Common Reduction Factor outlined in the HIPC Decision Point Document. There is one claim considered commercial debt which was originally contracted with a State-Owned Enterprise (SOE) in the former Yugoslavia. The Central Bank of Serbia, however, notified the Debt Management Department of Ministry of Finance of Somalia that it is in the hands of a commercial company. A comprehensive overview of the debt stock as of the end of Quarter 3, 2025, is presented in Table 1, while Table 2 outlines the arrears stock at the same date.

It is important to note that the data presented in this bulletin pertains exclusively to the Federal Government's external Debt. At present, Somalia has not issued domestic securities, undertaken domestic borrowing, or provided any government guarantees.

Timely debt servicing and arrears prevention during Q3, 2025:

The Ministry ensured that all scheduled payments in Q3, 2025 were made on time, with no arrears incurred. The government remains resolute in its commitment to meeting debt obligations as they become due. Table 3 details the debt service payments for the third quarter of 2025 categorized by creditor (in millions of USD).

3. Risks of the Debt Portfolio

a. Interest rate risk indicators

Most of Somalia's outstanding current debt portfolio has been contracted with fixed interest rate and denominated in foreign currency. However, when taking into account the existing stock of arrears, there are few loans that were originally contracted with variable interest rates. Debt with variable interest rate is limited to loans from Iraq and Libya amounting to USD 11.75 million. Out

of the total Face Value of debt, including arrears, only 1 percent had been contracted with variable interest rates:

b. Refinancing risk

The total amortization payments scheduled within one year is limited to multilateral and official creditors. The following profile illustrates a concentration of payments occurring between 2026 and 2049, due to the scheduled repayment of restructured debt agreements with creditors. It is important to highlight that the repayment profile has increased from 2026 to 2033 due to the inclusion of debt service obligations to Spain, for which negotiations are still in progress as efforts persist to finalize the bilateral agreement in accordance with the Paris Club Agreed Minutes of March 2024, alongside a Poverty Reduction and Growth Trust (PRGT) loan from the International Monetary Fund (IMF) that was made available to the government for budgetary support. Furthermore, the increase in high debt servicing for the periods from 2035 to 2044 is associated with the AMF normalization of payments. With an average maturity period of 19.5 years, Somalia's debt portfolio exhibits a low refinancing risk.

Fig. 2: Somalia repayment profile. 2026 – 2049. Million USD

Source: DMD, Ministry of Finance, FGS.

c. Foreign exchange rate risk

As mentioned in the previous section, all of Somalia's debts are denominated in foreign currency. The breakdown of debt by currency shows that 25 percent is in Arab Emirates Dirham (AED), followed by 19 percent in Kuwaiti dinars, 19 percent in Arab Accounting Dinar (AAD), 12 percent in Special Drawing Rights (SDRs), 11 percent in USD, and 14 percent other currencies.

Figure 3: Somalia, total debt stock at the end of Q3, 2025 by currency.

d. Summary of Somalia's cost and risk indicators at end of 2024¹

Table 5 below provides an overview of existing cost and risk indicators for Somalia's debt portfolio as of end of 2024. The indicators show a relatively long ATM (and ATR as all the current debt is in fixed interest rates) of over 19 years with a small percentage falling due in the next year (2.1 percent of total debt).

¹ Includes all restructured debts. Excludes existing debt in arrears.

Table 5: Summary of cost and risk indicators at the end of 2024

Risk Indicators		Total debt
Refinancing risk	ATM (years)	19.5
	Debt maturing in 1yr (% of total)	2.1%
Interest rate risk	ATR (years)	19.5
	Debt refixing in 1yr (% of total)	2.1%
	Fixed rate debt (% of total)	100.0%
FX risk	FX debt (% of total debt)	100.0%

e. Debt ratios

Projected debt service ratios in terms of revenues (including grants) and exports of goods and services show similar ranges. Table 6 below shows the projected debt service ratios.

4. Upcoming Activities for Q4, 2025

The Government remains firmly committed to implementing a comprehensive strategy to engage with non-Paris Club members and remaining multilateral creditors to secure the full debt relief envisioned under the HIPC Initiative. To advance this objective, the Debt Management Unit (DMU) has prepared targeted plans to initiate and facilitate discussions with a broad range of creditors. These engagements will serve as critical platforms for consensus-building and for identifying the most effective modalities to deliver the outstanding HIPC debt relief.

This proactive and coordinated approach underscores the Government's strong dedication to resolving its debt challenges through constructive and sustained dialogue with international partners. Through active participation in these engagements, Somalia aims to secure comprehensive debt relief that will reinforce its economic recovery and support its long-term development priorities.
